Panoak Oil & Gas Corporation

Welcome to Panoak Oil and Gas Corporation and welcome to the future of energy in America, NOW! At Panoak we specialize in America's **GREEN FOSSIL FUEL**, Natural Gas.

PERSONAL SERVICE

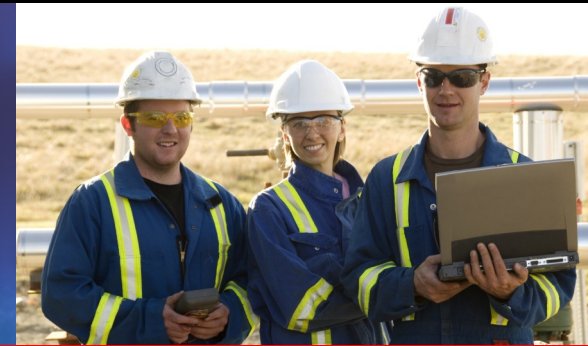

Panoak Gas Company

In 1987, after the Federal Energy Regulatory Commission (FERC) ordered the major interstate pipelines to open access to transportation, Panoak discovered that it could cut the cost of gas to municipalities by as much as 60% versus what was being charged by the major pipeline companies. Panoak provides municipalities with natural gas purchased at market cost and then competes using lower profit margins for pricing. Panoak also produces, operates and delivers Natural Gas as well.
